[mission 44] \$ gsh goal

Mission goal

A secret message has been found, it is kept in the drawer in Merlin's office. It was probably enciphered using a Caesar shift cipher. Decrypt it by making an exhaustive search from the command line.

Hint

All other secret messages that have been found were using a shift between 10 and 16.

Useful commands

tr STRING1 STRING2

Replace each character STRING1[i] by STRING2[i] on the standard input, and output the result.

Remark: "tr" is an abbreviation for "translate".

Example: if

STRING1 = "abcdefg"

STRING2 = "klmnop"

the file will be output with the following substitution (other characters are left unchanged)

a → k b → l c → m

d → n e → o f → p

Note: instead of "abcdefg", it is possible to write "a-g".

This command is particularly useful with a redirection "<".
